## समय

बिहान उठी हात मुख पहिला धुन्छु म  
आगतीबिच गएर उफ्री व्ययाम गर्छु म ।  
घामको ज्योती जिउमा पारी ढोग्दछु सूर्य म  
घामभै चम्कूँ उज्यालो छरु, पृथ्वी ढोग्दछु म ।  
चिया र नास्ता खाएर केही किताब पढ्छु म  
किताब ,कापी, कलम, खाजा भोलामा राख्छु म ।  
म खाना खान, स्कूल जान हतार गर्दिन  
समय ख्याल गरेर हिड्छु, धोकामा पर्दिन ।  
समयसगैँ काममा लागे , सबैको पियारो  
समय खेर फालेन भने , पर्दिन अफ्ठ्यारो ।

## Life

Life can be defined as the time span between birth and death. In general, life is the ability to breathe, grow, reproduce etc which living beings can do before they die and these things cannot be done by any living things.

In childhood, life seems to be wonderful. Gradually, children come across many experiences and activities. They start learning something everyday. Later, when people have to keep their body and soul together, they know that life is work and struggle. They become so busy that they cannot fully enjoy their life.

In fact, life is half spent before we know what life is. For some people, life may be golden and cheerful but for some, it is sorrow. For some life is rose but for some life is a thorn. Some people live for themselves and some people for others. If we do not forget that we have to die, life is a sweet love, labor and hope although it is short. Life is actually for others. It is for the total upliftment of mankind.

Simply, life is engaged in formal education for more than two decades and half, then jobs to make a living and finally in the management of retired life.

To conclude, life is learning and learning is life until the death knocks at our door.

### **Nature and its beauty**

Full of beautiful places is nature,  
It is made up with lots of creatures.

Birds singing song in the morning,  
Preserving nature is the best part of learning.

Presence of blue sky and green forest,  
And those green forests are being rarest.

Those twinkling stars at the night,  
Have such a pretty light.

A nature having a lot of beautiful creature,  
I think it will be our best future.
